

# BigBlaster™ / MiniBlaster™

## BigBlaster™

The BigBlaster™ is our largest continuous flow confetti cannon and is capable of shooting confetti at the rate of one (1) pound per second up to 80 feet into the air! In general, the BigBlaster™ is used for large venues such as stadiums, arenas, or large outdoor events. No electrical power is required. The standard BigBlaster™ set-up is comprised of a BigBlaster™ and 2 – 50 pound CO<sub>2</sub> tanks. Each BigBlaster™ requires an operator to feed the confetti into the hopper for proper effect performance and control.

## MiniBlaster™

The MiniBlaster™, a smaller version of the BigBlaster™, is a continuous flow confetti cannon and is capable of shooting confetti at the rate of one half (1/2) pound per second up to 50 feet into the air. The MiniBlaster™ is very versatile and can be used in large, medium or small venues. It is extremely easy to handle and allows easy adjustment to achieve a variety of different effects. No electrical power is required. The standard MiniBlaster™ set-up is comprised of a MiniBlaster™ and a 20 pound CO<sub>2</sub> tank. Each MiniBlaster™ requires an operator to feed the confetti into the hopper for proper effect performance and control.

To see the various effects possible with the BigBlaster™ and MiniBlaster™, or to view a how-to-use demonstration, please visit our website at: [www.artistryinmotion.com](http://www.artistryinmotion.com), navigate to the Confetti Equipment page and select the appropriate Blaster.

## Pricing

Please see the Company Overview & Pricing insert card of this brochure for current purchase and rental rates.

Technical specifications of the BigBlaster™ and MiniBlaster™ can be viewed on the reverse side of this card.
